ALPHA1 L 25-60 180		
0		
Product No.: On request	Note! Product picture may differ from actual product	
Grundfos ALPHA1 L 25-60 180 is a high-efficiency circulator pump with permanent-magnet motor (ECM technology).		
The pump features three control modes; radiator heating mode, underfloor heating mode and constant curve/constant speed.		
Furthermore, the speed can be controlled by a low-voltage PWM (Pulse Width Modulation) signal.		
The pump has a ceramic shaft and radial bearings, carbon thrust bearing, stainless-steel rotor can, bearing plate and rotor cladding, composite impeller, all of which contribute to long life, and the pump is self-venting, which contributes to easy commissioning as well as simple selection of control mode.		
The compact design featuring installations as well as boilers.	pump head with integrated control box and control panel fits into most common	
The pump and motor form an i the bearings are lubricated by	ntegral unit without shaft seal. The pump is of the wet-runner design. This means the pumped liquid. These constructions ensure maintenance-free operation.	
The pump housing is made of	cast iron and is electrocoated to improve the corrosion resistance.	
The motor is a synchronous permanent-magnet rotor/compact-stator motor. The pump controller is incorporated in the control box, which is fitted to the stator housing and connected to the stator via a terminal plug.		
Features ALPHA1 L • Three constant curves/consta • Radiator heating mode.	ant speed.	
 Underfloor heating mode. PWM profile for heating appliusing a digital source. 	cations (profile A). The PWM signal is a method for generating an analog signal	
• Runs reliably and efficiently u	with the ErP directive e from the front of the control box. Inder even the most demanding conditions er plug, with two possible cable gland positions.	
Liquid: Pumped liquid:	Water	
Liquid temperature range:	2 95 °C	
Selected liquid temperature: Density at selected liquid temp	60 °C perature: 983.2 kg/m ³	
Technical:		
TF class: Approvals on nameplate:	95 CE,VDE,EAC
